Jeff Carrick  
Puget Sound Blood Center  
921 Terry Avenue  
Seattle, WA 98104

Dear Jeff;

St. John Medical Center wishes to express our thanks for the excellent products and service Puget Sound Blood Center continues to provide for our hospital. As you know, St. John requires blood deliveries five days a week in order to maintain an adequate inventory at all times. We rely on Puget Sound Blood Center to provide our hospital and our patients with a safe, reliable blood supply.

Since July 1<sup>st</sup> of 2004, St. John has transfused 2,294 units of red cells, 158 units of leuko-reduced red cells, 633 units of plasma, and 59 units of platelets. I am sure the many patients who have benefited from these transfusions would join St. John in saying "Thank you" for ensuring the highest level of safety, quality, and availability of these vital blood products.

Kind regards,

Randy Querin
